-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said anchor" in line 14. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 2, and 6-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Loken et al.

Loken et al. teach a drum-in-hat park having a first brake shoe and a second brake shoe that are respectively retained on a backing plate (16) that is secured to said

Art Unit: 3683

vehicle, said first brake shoe (12) having a first brake assembly for a vehicle web with a first engagement end and a second engagement end, said second brake shoe (14) having a second web with a first engagement end and a second engagement end, said first engagement end of each of said first and second webs being aligned with an actuator assembly (100) while said second engagement end of each of said first and second webs being spaced apart by an adjuster mechanism (33), spring means (51) attached to said first and second webs for urging said first and second webs toward said anchor (26), actuator assembly (100) and adjuster mechanism (33), said adjuster mechanism including a yieldable member (32) for reducing the space between said second engagement end of each of said first and second webs to limit braking force to a predetermined maximum. (Figure 2)

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Loken et al.

Loken et al. does not teach wherein the spring comprises a plurality of aligned domed washers. It would have been obvious to one of ordinary skill in the art at the

Art Unit: 3683

time the invention was made to substitute a coil spring for stacked Belleville washers since both are well known equivalent compression spring means.

Allowable Subject Matter

7. Claims 15, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 4 and 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sherman, II et al., ('852, Sherman, II et al., '633 and Evans teach parking brake assemblies including adjuster mechanisms.
